Asia International Mathematical Olympiad (AIMO)

THE ULTIMATE INTERNATIONAL MATHEMATICS COMPETITION

20 May 2019

Since its inaugural year in 2012, Asia International Mathematical Olympiad, or AIMO for short, has built a reputation, and is widely known, for the sophistication quality of its questions. This is the second year Edukultur Indonesia is bringing a team from Indonesia to compete at the AIMO Final.

I am happy to invite all AIMO 2019 Indonesia Trial Round Gold awardees to join us and participate in the AIMO 2019 Final Round – which will be held on 4 to 8 August 2019 in Taipei and Taichung, Taiwan.

This year during the Finals, Hong Kong Mathematical Olympiad Association is introducing a sister competition of AIMO which is called the World Mathematical Games Open (WMGO). WMGO is a unique concept of mathematics competition which tests participants' ability to play interactive mathematical games and solve puzzles. Participation fee of WMGO is free. If your child/student joins AIMO, he/she is automatically registered for and will be joining WMGO as well.

I look forward to seeing all of you in August in Taiwan!

Best,

Roy

Roy L.
Country Director of AIMO for Indonesia
