**Re: COVID-19 Update as of 19 March 2020**

Dear BINUSIAN families,

We inform you today that a BINUSIAN colleague from BINUS UNIVERSITY at the Anggrek campus is now being cared for after testing positive yesterday (18 March) for COVID-19. As a result, intensive quarantine began in the Anggrek campus last night for all its facilities. The rest of the BINUS campuses will implement its intensive quarantine procedure beginning today, 19 March, to ensure the safety of the community as well as the security of all campuses.

***Rest assured that no direct impact to the schools has been identified in relation to this case.*** To date, no BINUS SCHOOL community member has been suspected of nor confirmed to be COVID-19 positive. However, as an additional precautionary measure, all BINUS SCHOOL will implement a 'work from home' programme for all its personnel, effective 19 March, as well as continue with its intensive disinfecting and cleaning of all facilities.

This COVID-19 pandemic has definitely affected our way of life. As with any unfamiliar and evolving situation, adjustments need to be consciously and proactively made especially in consideration of everyone's health and well-being. We thank you for your patience and support for all the adjustments we have been making as this situation continues to develop.

To this day, all BINUS SCHOOL remains committed to nurturing a healthy and vibrant learning community. Regardless of the situation, we remain one with you in providing the best education available for all the children under our care.

Thank you.

Best Regards,  
BINUS SCHOOL Education
